VIU SCIENCE & TECH COMMUNITY LECTURE

Forensic Entomology

Dr Gail Anderson

ABSTRACT: Forensic entomology is the study of insects, their life cycles, and their succession on decomposing bodies. Dr. Anderson will discuss how insects can be used to estimate time since death and to pinpoint the location of wounds in human and animal crime scene investigations.

Bio: Dr. Gail Anderson is a Professor in the School of Criminology and the Co-Director of the Centre for Forensic Research at Simon Fraser University. ... She is a forensic entomology consultant to the Royal Canadian Mounted Police (RCMP) and Municipal Police across Canada as well as the SPCA and Wildlife Enforcement.
